JUST ABOUT OURSELVES 1923 ★

U. S. Department of Agriculture

ALL OF THE TREES we offer are grown right here on our own land and under our own care. We are proud of our record of the orchards that are growing in every state from the trees we have produced. Some of our customers have been with us for more than forty years, and we expect to keep right on serving a larger circle of new customers every year with Bagby quality trees. We make no claims at listing a great number of varieties of every kind of fruit. Neither do we aim to set forth in glowing language the supposed merits of new and untried sorts. This little catalogue contains only the standard, time-tried and tested varieties, with the descriptions written as accurately and as conscientiously as we know how.

Over fifty years of experience in the nursery business has taught us that our customers like our way of doing business, for they know that we do not exaggerate the merits of our varieties. We produce good stock, true to name, pack it well, ship it promptly and in good condition, and charge only reasonable prices. Let us fill your order.

R. J. BAGBY, President

J. L. BAGBY, Secretary.

"What Shall I Plant?"

We wish to say that the small-size trees are strictly first-class and well-rooted, and by many will be preferred to the larger ones. So many ask, "What should I plant in my locality?" that we will here name a few of the popular and profitable sorts for general planting.

APPLES

Jonathan, Delicious, Mammoth Black Twig, Gano, York Imperial, Winter Banana, Stayman Winesap, Rome Beauty, Winesap, Grimes' Golden, Maiden Blush, Yellow Transparent. This is our Commercial List. Others would add, perhaps, Ben Davis, Arkansas Black, Missouri Pippin, Duchess of Oldenberg, etc. All of the above are good, profitable sorts, both for home use and market.

PEACHES

If you want to market your fruit, avoid planting too many early sorts. Elberta, J. H. Hale, Carman, Captain Ede, Crosby, Heath Cling, Chair's Choice, Gold Dust, Belle Ga. and Crawford are all profitable for market. Should early sorts be desired, Mayflower, Greensboro, Alexander and Sneed are what you should plant. Plant October Beauty for best late yellow cling. If for home use, plant general assortment, including above, for a succession. The peach tree should have shoots and branches shortened every year or two. The land should be kept in a high state of cultivation.

PEARS

The fact is more and more apparent that Kieffer and Garber will stay in the lead for profit in the Mississippi Valley states. Duchess, Bartlett, Winter Nelis and Anjou can be profitably planted farther west. Koonce is the best early Pear.

CHERRIES

Early Richmond, Dyehouse, Montmorency, Wragg (Sour), Governor Wood, Elton and Magann (Sweet) do very well and are profitable. For general planting we do not recommend the English Morello.

PLUMS

Wild Goose (Native), Common Damson, Shrop Damson, German Prune (European), Abundance, Wickson and Burbank (Japanese), are all good bearers and profitable. We consider the Abundance, Wickson and Burbank the best of the well-known Japanese sorts. **BLACK BEAUTY IS THE BEST OF ALL.**

WHOLE ROOT TREES

All our Apple, Pear, Peach, Plum and Cherry trees are grown on "whole roots." Our Apples are grafted and planted so that the scion also roots. Don't pay extra prices for "trade marks." We give our customer the very best, and we don't ask two prices. A trial order will convince you. In planting our trees, you get the best that experienced and skilled labor can produce.

OUR SHIPMENTS

Our shipments for Spring 1922, and Fall 1922, consisted of over one million fruit trees, which went to thirty-seven states and territories. A total of about thirty furniture car loads. We are now growing on our premises over one million fruit trees, all clean and healthy; nothing over two years from bud or graft. We do not claim you should plant "Bagby-grown or none at all," but we do want to impress on you the fact that there are NONE BETTER.

Apples

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of all other fruits, extends nearly or quite through the year. By planting judicious selections of summer, fall and winter sorts, a constant succession of this most desirable fruit will be obtained. Apple planting can never be overdone.

Our apples are all grown on Missouri river upland, on well-branched, whole roots, smooth, clean and well grown in every respect. No better trees can be found anywhere.

| | Each | 10 | 100 | 1000 |
|--|--------|--------|---------|----------|
| 1-year, 2 to 3 feet, whips..... | \$0.30 | \$2.50 | \$20.00 | \$160.00 |
| 1-year, 3 to 4 feet, select..... | .40 | 3.50 | 30.00 | 250.00 |
| 1-year, 4 to 5 feet, well branched, first class..... | .45 | 4.00 | 35.00 | 300.00 |
| 1-year, 5 to 6 feet, well branched, select..... | .65 | 5.00 | 45.00 | 400.00 |

Summer Apples

BENONI. One of the best summer sorts. Flesh yellow, tender, pleasant. Core small. Tree vigorous and upright.

CAROLINA RED JUNE. (Red June.) Medium size; red, flesh white; last of June. Tree is very vigorous, upright, an early and abundant bearer.

DUCHESS OF OLDENBERG (Russian). Medium to large size; skin yellow, streaked with red, somewhat blushed. Productive. August.

EARLY HARVEST. Medium to large, bright straw color; flesh white. Tree moderately vigorous and productive. First of July.

RED ASTRACHAN. Large, crimson, handsome; rather acid, but good and crisp; profitable. Early.

YELLOW TRANSPARENT. This valuable apple is said to be of Russian origin. We find it to be a valuable addition to our list. Medium to large; nearly white.

Fall Apples

MAIDEN'S BLUSH. Rather large, evenly shaded red cheek or blush on a clear pale yellow ground; bears large crops. August and September.

GRIMES' GOLDEN. Medium to large; rich golden yellow; flesh tender, mild, sub-acid. Should be gathered before turning yellow and put in a cool place, and often keeps until February. Tree hardy, vigorous; an early and abundant bearer. October to January.

RAMBO. Medium, streaked with dull red and somewhat dotted, productive and vigorous. Season, September to November.

WEALTHY. An apple of fine appearance and quality, an early and profuse bearer; a good market apple of its season. Tree hardy; in size and beauty it equals Baldwin, and is a better dessert apple. Ripens here in August. Winter apple North.

Winter Apples

ARKANSAS BLACK. Origin, Bentonville, Arkansas. The tree is a beautiful, upright grower, young wood very dark. Fruit medium to large; fine flavor; beautiful dark color, almost black; flesh yellowish, slightly subacid, crisp. One of the best cooking apples; vigorous. January to May.

BEN DAVIS. Fruit medium to large, flesh white; an excellent variety. Tree very hardy; a free grower, coming into bearing early and very productive; very popular. December to March.

BLACK BEN DAVIS. Ben Davis type. Dark red color.

DELICIOUS. A remarkably popular variety in the West, and rapidly taking first rank both for commercial and home orchards in all the apple growing sections of the country. Fruit large, nearly covered with

Grimes Golden

dull dark red; fine grained, crisp, juicy; quality best; a splendid keeper and shipper; vigorous grower.

HUNTSMAN'S FAVORITE. Originated in Johnson county, Missouri. Very large; golden yellow, with bright red cheek; nearly sweet, fine flavor, very aromatic. One of the best and highest selling market apples; tree very healthy and productive. November to January.

BALDWIN. Large, rounded; deep bright red over yellow ground; few russet dots, very productive. A great market variety. Very popular. November to February.

GANO. This apple was introduced to the public in 1886. Tree very hardy; it bears very young. Fruit bright red on yellow ground, no stripes; large; oblong, tapering to the eye; surface smooth, takes a very high polish, making it valuable as a stand fruit; flesh white. Annual, early, prolific bearer.

INGRAM. A seedling of the old Janet. Originated near Springfield, Mo. Its habits are similar to the Janet, but the tree is a more upright grower and the apple is not subject to crack. Size medium; striped bright red in the sun; flesh greenish-yellow, agreeable, subacid flavor; a good keeper. Tree hardy, late bloomer; very productive.

JANET (Rawle's Janet). Medium, roundish, greenish-yellow, striped with red; rich and juicy, one of the best and longest keepers in the South and Southwest; valuable for its high quality and its late blooming; moderate grower. January to March.

Delicious

Mammoth Black Twig

JONATHAN. Fruit medium, roundish; skin yellow, nearly covered with dark or lively red; moderate grower. One of the best apples for home use or market, as it is a delicious dessert apple that always commands the highest market price. October to January.

LIVELAND RASPBERRY. Fruit good sized, clear, waxy, white striped and marbled crimson; flesh snow white, often tinged pink next to the skin, a very popular early summer variety. Blooms late, is blight resistant, bears early, makes a good filler.

MAMMOTH BLACK TWIG. Supposed to be a seedling of the Winesap, but tree a better grower in the nursery and fruit much larger; or, in other words, an improved winesap. Tree a fine, upright spreading grower.

MISSOURI PIPPIN. Large, oblong, bright red with numerous gray dots; very handsome, fair quality, an early and very abundant bearer, and very profitable. December to March.

MINKLER. Bright red cheek. One of the very best late keepers. Seedling of Little Red Romanite.

ROME BEAUTY. Large, yellow shaded with red; tender, juicy, subacid. October to February.

STAYMAN WINESAP. Not quite so well colored as Winesap, but larger; a good keeper. Valuable for market or home use. A vigorous grower and adapts itself readily to different soils and conditions.

TALMAN SWEET. Of medium size, pale yellow, slightly tinged with red; firm, rich, sweet. The most valuable apple for baking; keeps well till April.

WINESAP. Medium, dark red; a favorite market variety in the West. November to April.

WOLF RIVER. Very large and handsome; flesh whitish, sub-acid, good bearer. Very handsome and showy. November and December.

WINTER BANANA. Fancy market fruit; large, pale yellow, pink blush. Tree a strong grower.

YORK IMPERIAL. This apple has been gaining favor, and is being planted largely in the West as a commercial sort. Large, smooth, yellow, shaded red, with indistinct red stripes.

Crab Apples

TRANSCENDENT. Remarkably vigorous, growing to a good size, and immensely productive. Bears a little the second year from planting, and every year after, and produces good crops by the fourth year. The best of its class for cooking and eating; juicy and crisp.

Skin yellow, striped with red. September to October.

WHITNEY. Large, averaging 1½ to 2 in. in diameter; skin smooth, glossy green, splashed with carmine; flesh firm, juicy and rich. Very hardy; vigorous, handsome.

Prices for Crab Apples are the same as for other Apples.

A Money-Making Orchard

Peaches

We are "Headquarters" for True to Name Peach Trees in the West, and can supply in any quantity—the best up-to-date market sorts. Our Peaches are stocky, nicely headed, smooth, straight bodies, well rooted, on healthy peach stocks and free from any disease. Remember this in comparing prices with other establishments. Over 150,000 sold and shipped to other nurserymen in 1922.

| Extra select, 5 to 6 feet..... | .50 | 4.00 | 35.00 | 300.00 |

ALEXANDER. Large size, handsome and regular in form, with deep maroon shade; adheres to stone; should remain on the tree until fully ripe. White flesh. Early in July.

BELLE OF GEORGIA. Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific; fine shipper. Ripens with Early Crawford.

CARMAN. White flesh, large, with beautifully mottled red cheek. A valuable home or market sort. Season about fourteen days later than Alexander and about three weeks earlier than Elberta. Our stock came from the originator, and is true to name.

CHAMPION. Originated at Nokomis, Illinois. Fruit large, beautiful in appearance; flavor delicious, sweet, rich and juicy; skin creamy-white, with red cheek; freestone. August 15.

CHINESE CLING. The most popular Southern peach; shape is oblong, has creamy skin with faint flashes of red. August.

CRAWFORD'S EARLY. This beautiful yellow peach is highly esteemed for market purposes. Fruit very large, oblong, skin yellow, with fine red cheek; flesh yellow, juicy, sweet and excellent; free. Last of July.

CRAWFORD'S LATE. Fruit of the largest size; skin yellow, or greenish-yellow, with dull red cheek; flesh yellow; productive; one of the best free-stones. August and September.

CHAIR'S CHOICE. Large, late, yellow. One of the best for home or market planting. September.

CROSBY. If you want peaches every year, try some Crosby. It is medium size, rich orange yellow, splashed with red, and of the best quality. Mid-season.

CAPTAIN EDE. Originated on farm of Capt. Ede in Illinois. Is a splendid yellow free-stone variety. In appearance Captain Ede is very much like Elberta, which it equals in every way, except not quite so large, but is better quality.

ELBERTA. A Georgia cross between Crawford and Chinese Cling; very large, well colored; all things considered, the finest yellow free-stone in cultivation; no one can go amiss by planting it; the fruit is perfectly free from rot, and is one of the most successful shipping varieties. August and September.

FAMILY FAVORITE. Free, seedling of Chinese Cling, of better color; large, clear, waxen complexion, with blush; prolific, firm; a valuable variety for shipping or drying. Last of July.

FOSTER. Same season as Crawford's Early; much more productive; yellow, with red cheeks; quality best; good size.

FITZGERALD. Of Crawford type. A seedling found at Oakville, Ont., where it stands the winter perfectly; is about as hardy as Elberta; quality first-class; yellow free-stone, and we recommend it.

GREENSBORO. Large, oblong, greenish-yellow shaded red, flesh creamy; among the best; tree vigorous, prolific; grown largely in Georgia and the South for Northern markets. Ripe June 25th.

Gold Dust

J. H. Hale

GOLD DUST. If you want the very best canning variety, this is the peach. Large yellow cling-stone; juicy, productive and of best quality. Season, September 1st to 10th.

J. H. HALE. Ripens about August 10. Yellow, finely colored; large, round, and of excellent quality. Free-stone.

HENRIETTA (Levy). Magnificent yellow cling, large size, slightly covered with bright crimson, hardy, productive, always commands fancy prices. September 25th.

HILEY. Ripens last of July. Yellowish white skin with deep red cheek. Flesh is white and very juicy. Large size. Free-stone.

HEATH CLING. Large, oblong, creamy white, slightly tinged with red in the sun; very tender, juicy, melting; very rich and luscious. September 15th.

KRUMMEL. Ripens September 10 to 25. Skin yellow, overlaid with crimson blush. Free-stone. The fruit is nearly round, quite large. Flesh is fine grained and has a delicious flavor. Krummel grows well in the northern and southern sections.

MOUNTAIN ROSE. Large, red; flesh white, rich, juicy, excellent. Season, August 1st to 10th.

MILLER CLING. An extra large cling-stone. Hardy, productive, and of best quality. Earlier than Heath Cling, but larger and better color.

MAMIE ROSS. Large, white, almost covered with carmine; flesh white, juicy, and of good quality. One of the best for family use, and probably the best early commercial variety. Semi-cling.

MATTHEWS' BEAUTY. Originated in Georgia. A late yellow free-stone. Fully as large as Elberta; two weeks later. A splendid shipper.

MAYFLOWER. A beautiful "red-all-over" peach; handsome and of splendid quality. Extremely early. Tree hardy and healthy.

OCTOBER BEAUTY. A late yellow Cling. Originated on the grounds of Judge Hugo Muench of St. Louis. We recommend it as the best late yellow Cling.

OLD MIXON FREE. Large, white flesh, with deep red cheek; rich and good; one of the best. August.

RINGGOLD CLING. Much larger than Heath. In every way an improvement on that popular kind. A very valuable peach. September.

SALWAY. Large, roundish, skin downy, creamy yellow, with a warm, rich, clear crimson red cheek in the sun; flesh deep yellow, stained with red at the stone; juicy, rich, very good. Free-stone. A good market sort. September 15. Hardy.

SMOCK FREE. Fruit large, skin orange yellow, mottled with red; a good market sort. One of the standard varieties. September 15. Hardy.

SNEED. Ripens earlier than Alexander, and belongs to an entirely different type; it is very distinct in tree and fruit, belonging to the Chinese Cling type; size medium; hardy.

STUMP THE WORLD. Very large; roundish; skin white, with a bright red cheek; flesh white; a free-stone. End of August.

TRIUMPH. The earliest yellow peach known; productive, hardy and profitable for market. Originated in Georgia. Hardy.

October Beauty

WONDERFUL. Color rich yellow; flesh yellow, highly flavored; firm. Ripens in September. Very similar to the Smock.

WHEATLAND. Large, roundish, skin golden yellow, shaded with crimson on the sunny side; flesh is yellow and of fine quality; tree vigorous grower. August. Season is just ahead of Elberta.

We want all our customers to plant **OCTOBER BEAUTY** (Late Yellow Cling) as the **LATEST** and **BEST**. Medium size, high color and quality.

Carman

Plum Trees

| | Each | 10 | 100 |
|-------------------------------------|--------|--------|---------|
| First class trees, 5 to 6 feet..... | \$1.00 | \$9.00 | \$65.00 |
| First class trees, 4 to 5 feet..... | .85 | 8.00 | 55.00 |
| First class trees, 3 to 4 feet..... | .70 | 6.00 | 40.00 |

ABUNDANCE. A hardy, productive Japanese sort. Large, purplish red; quality very best. Season, early in July.

BLACK BEAUTY (New). (See illustration and further description on inside back cover.) The best Japan sort we have ever grown. Large, very dark purple, almost black. Persimmon shape. Quality and size of Abundance. 5 to 6 foot trees. \$1.00 each; \$9.00 per 10; \$65.00 per 100.

BURBANK. Large, varying less in size than the other Japanese plums; it is nearly globular; clear cherry-red, with a thin lilac bloom; flesh deep yellow, firm and meaty; tree vigorous and productive. Last of July.

COMMON DAMSON. Well-known and very productive. Season, September.

COMPASS CHERRY PLUM. Hardy. Fruit when fully ripe, a dark wine color. Sweet, juicy and of very fine flavor. The tree is a regular and heavy bearer and produces fruit the next year after setting out.

GERMAN PRUNE. Very profitable and will succeed wherever Common Damson can be grown. Very large. We consider it the best of European sorts. August and September.

LOMBARD. Medium, round, oval, violet, red; juicy, pleasant and good; adheres to the stone. Tree vigorous and productive. It is a valuable market variety; one of the most hardy and popular. August.

RED JUNE. One of the largest Japanese varieties; ripening before Abundance. Tree upright, vigorous and hardy.

SHROPSHIRE DAMSON. A plum of fine quality, sprightly. In market it has commanded nearly double the price of the common Damson; enormously productive. Last of September.

WILD GOOSE. Large, rich, crimson, beautiful; flesh soft, melting, delicious, with a full, fruity flavor. Tree a strong grower, prolific.

WICKSON. We regard this as one of the best of the late ripening Japan sorts. Readily parts from the seed. Extra large. Season, August.

For the Home Orchard plant Abundance, Burbank, Black Beauty, Common and Shropshire Damson.

Pear Trees

Our Pears are especially clean, smooth and well rooted, grown on XX French imported stocks.

| | Each | 10 | 100 |
|--|--------|--------|---------|
| Leading sorts, first class, 5 to 7 feet, 2-year..... | \$1.00 | \$9.00 | \$75.00 |
| Leading sorts, 4 to 5 feet, 2-year..... | .80 | 7.50 | 70.00 |
| Leading sorts, 3 to 4 feet, 1-year, very fine..... | .70 | 6.00 | 50.00 |

For Kieffer and Garber in quantities of 300 or more, write us for special low prices.

Summer Pears

KOONCE. The handsomest, best and most valuable; very early pear; tree vigorous, upright grower, free from blight; magnificent foliage, which it retains late in the season; fruit medium to large; skin yellow, does not rot at the core, juicy, sweet and of a delicious quality. Is an excellent shipper.

BARTLETT. Large, skin very thin, clear lemon-yellow, with soft blush on the sunny side; flesh white, buttery, very juicy and highly flavored. The best summer pear in existence for quality.

CLAPP'S FAVORITE. Large, pale lemon-yellow, marbled with crimson on the sunny side and thickly sprinkled with brown dots; flesh finely grained and melting with a rich vinous flavor. August.

Koonce

ANJOU. One of the most delicious late fall pears; juicy and of excellent quality.

Autumn Pears

DUCHESS. Very large, greenish-yellow; sometimes a little russeted; makes a beautiful tree. One of the best. October and November.

GARBER. Originated in Pennsylvania. Fruit is large and beautiful; color bright yellow, with red; juicy and good; delicious canned. Ready to pick with LeConte, or a few days later, and much better, not only in fruit, but in hardiness and health of trees.

FLEMISH BEAUTY. Large, beautiful, juicy, melting, rich and fine; strong grower and good bearer; hardy everywhere. September and October.

KIEFFER. Tree a remarkable grower, with so vigorous a constitution that it rarely blights. Fruit of fine size, rich color and good quality. Brings high prices in competition with other varieties. Best when picked at maturity and house-ripened. October and November.

Cherries

There are few more desirable fruits than Cherries, and they can be grown for market with great profit. Along the street or avenue as ornamentals, especially the Heart and Biggarreau varieties are strong, vigorous growers, with large, glossy leaves and open, spreading heads, making a fine shade. Cherries thrive in almost any well drained soil. The fruit is equally delicious whether eaten from the tree or preserved, and it will always find a ready market at profitable prices.

Our Cherry trees are all budded on Imported French Mahaleb and Mazzard stock. They have fine roots and nice heads. All well rooted and will be graded full size indicated, and up

| | Each | 10 | 100 |
|--|--------|---------|----------|
| Leading sorts, extra select, 2-year, 4½ to 6 feet..... | \$1.25 | \$12.00 | \$100.00 |
| Leading sorts, first-class, 2-year, 3½ to 5 feet..... | 1.00 | 9.00 | 85.00 |
| Leading sorts, first-class, 1-year, 3 to 4 feet..... | .80 | 8.00 | 60.00 |
| Leading sorts, well branched, 1-year, 2 to 3 feet..... | .70 | 6.00 | 50.00 |

DYEHOUSE. Very early and sure bearer. Ripens before Early Richmond; but not quite as productive. May.

ENGLISH MORELLO. Medium to large, blackish-red; acid; juicy. Very productive. Short lived. July.

EARLY RICHMOND (Kentish Virginian or Early May). Medium size; red; melting, juicy, sprightly, acid flavor. This is one of the most valuable and popular of the acid cherries, and is exceedingly productive. First of June.

GOV. WOOD. One of the best sweet cherries; very large, light red, juicy, rich and delicious. Tree healthy and a great bearer. May and June.

LATE DUKE. Fruit similar to May Duke, but later and not so sweet.

MONTMORENCY. No doubt one of the finest acid cherries; tree very hardy and an immense bearer; commences to fruit while young and is loaded annually thereafter with fine crops; fruit of good size; fine flavor, and

of bright clear shining red; valuable everywhere, especially for Northern latitudes: larger than Early Richmond, and fully ten days later. Season, end of June.

MAGANN CHERRY. A new sweet cherry. Fruit large, almost black when fully ripe. growing in large clusters. It will pay you to include some of these in your order for other stock.

OSTHEIMER. Largest size, very dark: flesh tender, juicy. Late June.

WRAGG. Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the high altitude and prairie regions of the Northwest.

For Middle West we suggest as best commercial sorts in cherry—Richmond, Montmorency, Magann. For larger assortment include Dyehouse, Wragg, English Morello, Governor Wood.

Senator Dunlap Strawberries

Strawberry Plants

Prices of Strawberry Plants, for spring shipment only: Selected plants, \$1.25 per 100; by Parcel Post Prepaid.

Large orders must be sent by express. Small orders carry safely by mail. They do not carry well by freight.

AROMA. (Per.) Plants large, very vigorous and perfectly healthy. Makes plants just right for a good fruiting row. The blossom is rich in pollen, a good fertilizer for Sample, Bubach and Enormous. Fruit large to very large, roundish, conical, smooth and perfect in form, of a beautiful bright glossy red in color, very firm, and of excellent quality. Will give splendid results on any soil that will grow a good crop of corn or potatoes. It is nearly as late as Gandy, of long season. Three times as productive and a sure cropper every year. During the past five years the demand for plants of this variety has been very heavy and we have never been able to grow plants enough to meet this demand.

SENATOR DUNLAP. (Per.) A well-tested, wonderfully productive variety, one of the safe sorts to plant everywhere and sure to take a high place among the prominent standard sorts. Plant resembles Warfield, rampant runner, should be restricted in its production of plants; fully equal to Crescent and Warfield in its ability to succeed under all circumstances. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality. One of the best for canning; ripens early and continues a long time. It promises to stand at the head in its wonderful ability to ripen a good crop, under almost any condition of drought or neglect.

General Information

Fifty years have been spent in building up our nursery business here at New Haven. It was established in 1872 by Julian Bagby, the father of the present management. In 1892, the business was incorporated and since that date has been under the management of R. J. and J. L. Bagby, ably assisted by men in our employ. These employees have grown up in the business and are honored citizens in the community. We state this fact that our customers may know that their orders are handled by responsible men.

We own over four hundred acres of land, on which we grow our trees. This land has a value of over fifty thousand dollars. This information is given that you may know that we are responsible. We want you to feel as safe in dealing with us as you do with your bank.

About Agents

We are not employing traveling salesmen to solicit orders, but we shall be pleased to have you get a club among your neighbors, and on club orders amounting to \$100.00 or more, at single or ten rates, we allow you 10 per cent additional in stock. We put up each order in a separate package, so that upon receipt of the goods you have only to hand out the different lots as ordered. Many of our best customers buy in large quantities at the lowest rates and distribute in lots as ordered by their neighbors.

We also desire to sell to nurserymen and dealers who buy to sell again, and special prices will be made on carloads or larger quantities than indicated in this list.

References

Some of our correspondents have asked us to give them bank references, and we hereby comply, and refer to local banks and to the commercial agencies. We do our local business with Farmers' Savings Bank, New Haven, Mo.

Distances for Planting

| | |
|---|--|
| Standard Apples | 30 feet apart each way |
| Standard Pears and Strong-growing Cherries..... | 20 feet apart each way |
| Duke and Morello Cherries..... | 18 feet apart each way |
| Standard Plums, Apricots..... | 18 to 20 feet apart each way |
| Peaches, Nectarines..... | 18 to 20 feet apart each way |
| Dwarf Pears..... | 10 to 20 feet apart each way |
| Grapes | rows 10 to 16 feet apart, 7 to 16 feet in rows |
| Currants and Gooseberries..... | 3 to 4 feet apart |
| Raspberries and Blackberries..... | 3 to 4 by 5 to 7 feet apart |
| Strawberries for field culture..... | 1 to 1½ by 3 to 4 feet apart |
| Strawberries for garden culture..... | 1 to 2 feet apart |

Number of Trees on an Acre

| | |
|-----------------------------|-----|
| 30 feet apart each way..... | 50 |
| 25 feet apart each way..... | 70 |
| 20 feet apart each way..... | 110 |
| 18 feet apart each way..... | 135 |
| 15 feet apart each way..... | 205 |

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of square feet in an acre (43,560) will give the number of plants or trees to the acre.

A Few Words From Our Customers

Fayette Co., Pa., 3-29-22.

My order for trees received in good condition and am pleased to say they are bigger, and nicer trees than I expected and the best I ever received from any nursery regardless of price. I shall certainly favor you with any orders I may need in the future.

H. J. BRITTON.

Trimble, Co., Ky., 3-30-22.

I am well pleased with order received from you.

DAVID H. BEETEM.

McLean Co., Ill., 4-29-22.

Enclosed find check. There is no argument about the bill. Trees were fine, boxing fine, packing fine. I like to do business with such people, always on the square.

W. H. GIBBS.

Harrison Co., W. Va., 4-15-22.

Fruit trees arrived on the 12th. I am more than pleased with the peach and plum trees.

ARTHUR GREENE.

New Haven Co., Conn., 4-10-22.

We thank you for the trees sent on our order. They arrived safely, in fine condition.

PAUL HUDACK.

Pettis County, Mo., 4-11-22.

The shipment arrived in good condition. Many thanks for the Black Beauty Plum. They are fine.

C. E. FLETCHER.

Clinton Co., Pa., 3-28-22.

The order of trees consigned to me was received and in splendid condition. Am very much pleased with the trees. They are all and more than you described in your Price List.

REV. C. J. DICK.

Travis Co., Texas, 3-29-22.

I received the trees in good order. Am well pleased with them.

D. B. BURTON.

Callaway Co., Mo., 4-3-22.

I want to thank you for the nice condition the trees and plants were in when they reached me.

J. H. BURFORD.

Utah Co., Utah, 3-6-22.

Trees arrived on schedule time. They were all right.

B. H. BOWER.

Cumberland Co., Ill., 3-11-22.

The trees arrived the 8th, only two days on road. They are sure a dandy lot of trees and I know they will be true to name. I can recommend your trees to any one if they are all like the ones you sent me.

CLARK YOUNG.

St. Louis County, 3-15-22.

I received the trees in fine condition, as usual.

W. D. UZZELL.

Monteale Co., Mo.

Enclosed find check to balance my account with you. The trees you sent me were about the best I ever got. Thanks.

C. K. WILSON.

Marion Co., Ill.

The trees have been received and planted. We thank you for prompt filling of the order.

PERKINS BROTHERS.

Muskogee Co., Oklahoma.

The trees came through in fine shape. I thank you very much for the courtesy shown me this season.

JOHN F. SNEED.

Bradford Co., N. J., 3-27-22.

Received the peach trees and am pleased with them. You may expect my order in the fall.

ALFRED E. LOVESEY.

Shelby Co., Mo., 1-2-22.

Last spring I bought an order of nursery stock from you. We were highly pleased with everything. It came in first-class order.

JOHN LANGHAMMER.

Chautauqua Co., Long Island, N. Y., 3-13-22.

I received trees today and have set them. They arrived in perfect shape and I am pleased.

C. A. MAYO.

St. Louis County, Mo., 3-22-22.

Received trees in good order and thanks for such good service. You will always get my order when I need trees.

JOSEPH NOLAN, Sr.

Cape May, N. J., 4-22-22.

I received the trees and am well satisfied. They arrived in first-class shape.

W. T. GODFREY.

St. Charles County, Mo., Mar. 23, 1922.

The trees have arrived and have proved satisfactory.

HENRY ANGERT.

St. Clair Co., Ill., April 8, 1922.

Enclosed find check for order, which please send by express at once. I think this will be my last order for Spring delivery. I thank you for the clean work. I have so far not found one mistake.

J. A. ROHR.

Barton County, Mo., 3-27-22.

I got my peach trees all O. K. They are fine. Also Raspberry and Grapes. I thank you for the Black Beauty Plum, they are the finest I ever saw.

M. J. SNOOK.

Douglas Co., Kans., May 1, 1922.

Cherry trees came through all right. We thank you for the Black Beauty Plum trees which were included in our first shipment of trees.

E. H. SILER.

Pettis County, Mo., 2-13-22.

You will please pardon my negligence in not answering you on receipt of trees received from you last fall. I was well pleased with everything and also wish to thank you for the two Black Beauty Plum gratis. In the future when I need anything in that line will know where to get it. Also will be very glad to recommend your nursery stock to others.

FRED P. TIETZE.

Montezuma Co., Colo., 1-26-22.

Last Fall you sold me 200 fruit trees. The trees reached me in good shape and I want to thank you for the way you handled the order.

F. H. TAYLOR.

San Joaquin Co., Calif.

Enclosed find check to pay my account. The peach trees were a good lot of trees and I have had no trouble in disposing of them. The shade trees are all right, and I am selling them right along and they are giving good satisfaction.

T. J. STEPHENS.

Certificate of Nursery Inspection

University of Missouri Agricultural Experiment Station,
Columbia, Mo., Sept. 11, 1922.

This is to certify that, in accordance with the Nursery Inspection Act, passed by the Forty-seventh General Assembly, the nursery stock of the New Haven Nurseries, Nursery grown at New Haven, Franklin County, Mo., was inspected on August 24, 1922, by a duly authorized inspector, and found apparently free from dangerously injurious insects or plant diseases.

LEONARD HASEMAN,
Entomologist and Chief Inspector.

Spraying

Spraying is a vital necessity if money is to be made from fruit. It doesn't pay to miss one season, even if enemies are not visible. Spraying has an invigorating effect on trees, besides controlling enemies.

There are three classes of enemies spraying will control—chewing insects, sucking insects, and fungi. Each class requires a different remedy, but the remedies can be combined most of the time.

Spraying during the dormant period is distinctly different from spraying on foliage. Materials several times as strong can be used and are needed to control the scales.

On account of the life-habits of enemies, often only two to seven days are available for any one spraying. Do the work then. Put the material on with force and cover every inch of bark and leaf.

Get a sprayer that is big enough, that will give one hundred to two hundred and fifty pounds of air pressure, that is adapted to your land and trees, and that is durable. Get a power outfit, if possible, for it does better work than a hand-pump can.

The spraying programme ordinarily resolves itself into two, three or four applications—one while trees are dormant, with lime-sulphur solution, and the others on blossoms and fruit with self-boiled lime-sulphur, or diluted lime-sulphur, with arsenate of lead added, or maybe with Bordeaux and lead. All applications must be guided by careful study.

Borers will attack fruit trees in spite of all we can do, and will kill many trees if left alone. Trees must be gone over several times each year, and should be gone over each April and August.

We Grow Our Own Stock

We mail this list of prices to our friends and customers, and will ask that they favor us with their orders as early as practicable. We have now growing in our nurseries over one million fruit trees by actual count. All clean and healthy. ENTOMOLOGIST'S CERTIFICATE WITH EACH SHIPMENT. No San Jose Scale, Yellows or Rosette has been found in this County.

Shipments to Pacific Coast and Southern States from our frost-proof storage during winter months via Southern Routes.

WE ARE GROWERS OF WHAT WE SELL, having over 500 acres devoted exclusively to the nursery business. Many nurserymen are simply jobbers in the trade, and cannot sell stock with the same certainty of being true to name and free from disease.

New Haven Nurseries
New Haven, Missouri
